RADIOLOGICAL FIELD SERVICES

For characterization,
remediation, and
decommissioning
projects

Radiological monitoring is
one of the field services we offer.

Radiological Field Services

Eberline Services has 35 years of experience providing professional and technician staff for characterization, remediation, and decontamination and decommissioning (D&D) activities at contaminated sites and facilities. These include:

- Health physics/radiological control technicians (RCTs)
- Radiological engineers
- Health physicists
- Industrial hygiene technicians (IHTs)
- Industrial hygienists
- Health and safety technicians
- Waste management coordinators
- Laboratory technicians.

Corporate Experience

Eberline Services has provided health physics technicians and professionals for government projects continuously, starting with the Supplemental Test Site Program in 1967. Under a prime contract to the Atomic Energy Commission, Eberline Services trained and provided technicians and related staff for environmental, safety, and health support of all nuclear weapons tests performed remote from the Nevada Test Site. Since then we have provided field staff for projects such as

- Environmental restoration of Enewetak Atoll
- Remediation at Johnston Atoll
- Formerly Utilized Sites Remedial Action Program (FUSRAP)
- Maralinga Weapons Testing Site cleanup
- Health physics and industrial hygiene support to Bechtel on the Hanford Environmental Restoration Contract
- Remedial actions at Superfund sites
- Onsite laboratories for characterization and remediation projects.

Our field staff provides the following specialized services:

- Radiological characterization
- Radiological mapping
- In situ gamma spectroscopy
- Waste management
- Training.

In addition to staffing services, we can also provide radiological instruments.
